

PRACTICAL – 01

1.id:

```
akhil@DESKTOP-HL1VUUS:~$ id
uid=1000(akhil) gid=1000(akhil) groups=1000(akhil),27(sudo),100(users)
akhil@DESKTOP-HL1VUUS:~$ |
```

Report: After running the id command, I could see my user details. It showed my username as **pavani**, along with the user ID, group ID, and the groups I belong to like sudo and plugdev.

=

```

Report: When I executed the env command, many environment variables were displayed.

I observed variables like HOME=/home/pavani,

USER=pavani, PWD=/home/pavani/OSSP, and PATH, which contain information about the system environment.

```

Report: The export command displayed the exported environment variables. I observed that variables such as HOME, USER, PWD, PATH, and other system variables were available and exported for the current session

4. Alias:

```
akhil@DESKTOP-HL1VUUS:~$ alias
alias alert='notify-send --urgency=low -i "${[ $? = 0 ]} && echo terminal || echo error)" "$(history|tail -n1|sed -e '\''
s/^\s*[0-9]\+\s*//;s/;;s/[/;|/;s/alert$//'\''")'
alias egrep='egrep --color=auto'
alias fgrep='fgrep --color=auto'
alias grep='grep --color=auto'
alias l='ls -CF'
alias la='ls -A'
alias ll='ls -alF'
alias ls='ls --color=auto'
akhil@DESKTOP-HL1VUUS:~$
```

Report: After executing the alias command, the terminal displayed a list of shortcut commands.

I observed aliases like `grep`, `ls`, and `ll`, which are used as shortcuts for commonly used `ls` commands
