```

1. sudo apt update

Updates the package information from the configured repositories.

2. sudo apt upgrade

Upgrades the installed packages to their latest available versions.

3. sudo apt install gcc

Installs the GCC (GNU Compiler Collection) compiler required to compile C programs.

4. gcc --version

Displays the installed GCC compiler version.

5. nano process.c

Opens the process.c file using the Nano text editor. It can be used to create or edit a C prog
